

LOL-HECO-IR-18

Ref: "In addition, the Executive Team attended a presentation by various subject matter experts." (HECO T-1, page 12, lines 14-15)

Question(s):

- a. Who were these subject matter experts?
- b. Was the ET presented with any information on the present or future forecasted price of oil?
- c. Who is HECO's overseer of LW work, and did they make a presentation to the ET?

HECO Response:

- a. The subject matter experts that made a presentation to the Executive Team included:
Ms. Shari Ishikawa, Mr. Kerstan Wong, Mr. Tom Harrington, Mr. Ken Morikami, Ms. Earlynne Oshiro, and Mr. Robbie Alm.
- b. The Executive Team was not presented with any information related to the price of oil. As noted in the response to LOL-HECO-IR-5:
"Reduction in the demand for fossil fuel' was not a factor in the alternative selection process because the installation of any alternative would have had a negligible effect on system transmission losses, which in turn would have had a negligible effect on power generation."
- c. HECO currently has no specific "overseer" of Live Working maintenance at HECO and, thus, such a person did not present information at the Executive Team. However, Mr. Thomas L. Harrington, a participant on EDM International's study team for the Live Working study (Application Exhibit 7), presented information to the Executive Team on this subject.
